

SUSTAINABLE LIVING

The Stanley

Renewable. Sustainable. Healthy

The next generation of homes are now available in Fort Collins. Built to the Department of Energy's (DOE) Home Challenge standards that only the top 1% of builders achieve.

Revive homes are designed to be high performance and healthy environments. Geothermal and solar energy are standard features as well as all LED lighting, superior insulation, ventilation and windows. Comfort Plus™ features eliminate drafts, VOCs, asbestos, mold, and combustion risks as well as lower humidity.

Standard features included trowel wall, 5 panel doors, open floor plans with entertaining space on the inside and orchards, community gardens and parks on the outside.

Come enjoy the future of quality living today at Revive!
